

# Prison Program

*A throughcare model where individuals with a history of alcohol or drug issues can be engaged before, during and following imprisonment.*

The program offers a supportive, non-judgmental environment where you can begin to understand when, why and how you developed dependent behaviours including the use of alcohol or other drugs. Issues such as anger, domestic violence, gambling, sexual abuse, physical abuse, fear, anxiety and grief, may have impacted on your life and affected your decisions.

The program is designed to help you recognise and accept your responsibilities in your life and explore the range of choices you have.
